

SYED ABDUL QA HAR

Computer Science Undergraduate | Agentic AI & Generative AI | Full-Stack Development

Rawalpindi/Islamabad, Pakistan | +92-337-7315705 | syedabdulqahar2004@gmail.com

LinkedIn: linkedin.com/in/syed-abdul-qahar-47bb37274 | GitHub: github.com/syedabdulqahar | Portfolio: syed-abdul-qahar-portfolio.vercel.app

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Python, REST APIs, FastAPI, React.js, Next.js, and applied AI including LLMs, Retrieval-Augmented Generation (RAG), NLP/NLI, LangChain, and tokenization. Built and shipped full-stack projects spanning authentication, databases, and AI pipelines. Completed a 6-week AI/ML internship at Proton Soft Tech. Seeking an internship or entry-level role in AI/ML, Generative AI, Data Engineering, or Software Development.

EDUCATION

Bachelor of Science in Computer Science (BSCS) 2023 – 2027

Capital University of Science & Technology (CUST), Islamabad | CGPA: 3.15

Intermediate in Computer Science (ICS) 2020 – 2022

Punjab Group of Colleges, Quaid Campus | Grade: A

TECHNICAL SKILLS

Programming & CS Fundamentals: Python, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Error Handling

AI / Generative AI: Agentic AI, Large Language Models (LLMs), LangChain, RAG Pipelines, Fine-Tuning, Tokenization, BERT, DeBERTa

Backend & APIs: REST APIs, FastAPI, Node.js, Express.js, PostgreSQL, ChromaDB

Web Development: HTML, CSS, JavaScript (ES6), React.js, Next.js

Authentication & Security: JWT Authentication, bcrypt, RBAC/ABAC

Tools & Deployment: Git, GitHub, Vercel, Netlify, Cursor, Claude, ChatGPT

Soft Skills: Communication, Time Management, Problem Solving

PROJECTS

PakLawAI — Legal Consistency Checker for Pakistani Law | Final Year Project 2025 – Present

- Built an AI-powered legal consistency checker using Next.js, FastAPI, and PostgreSQL to identify contradictions across Pakistani statutes.
- Designed a Retrieval-Augmented Generation (RAG) pipeline with ChromaDB for semantic search over legal text.
- Applied NLP/NLI (Natural Language Inference) techniques to detect logical inconsistencies between legal clauses.

Database Security: RBAC/ABAC Access Control System | Semester Project 2025

- Implemented Role-Based and Attribute-Based Access Control (RBAC/ABAC) in PostgreSQL and Python.
- Designed database-level security policies to enforce granular, attribute-driven permissions.

UI/UX Designs | Personal Projects 2024 – 2025

- Instagram Clone — designed a pixel-accurate feed, post, and profile interface replicating platform UX patterns using React.js.
- WhatsApp Web Clone — recreated real-time messaging UI/UX, focusing on layout, responsiveness, and interaction design with React.js and ES6.
- Hungry Pizza — designed and built the end-to-end UI/UX for a freelance restaurant ordering website delivered to a real client.

EXPERIENCE

AI/ML Intern | Proton Soft Tech 6 Weeks, 2025

- Gained hands-on exposure to AI/ML workflows, including data preprocessing and model evaluation in a professional environment.
- Collaborated with a technical team on applied machine learning tasks, strengthening practical Python and ML tooling skills.

Volunteer | Islamabad Traffic Police 5 Weeks

- Assisted in traffic management and public coordination during a 5-week community volunteering program.

CERTIFICATIONS & HONORS

- Dean's Honor Roll Certificate — Capital University of Science & Technology (CUST)
- Python for Everybody — University of Michigan, Coursera
- Python Data Structures — University of Michigan, Coursera
- Python for Accessing Web Data — University of Michigan, Coursera
